Statement of Volatility

This letter is provided to describe Non-Volatile Memory for Product: **NIC10G**

This product contains non-volatile memory, i.e., memory in which the contents are retained when power is removed.

Table 1. Non-Volatile Memory

Type of Memory	Size	User Modifiable	User Data Access	Function	Process to Clear
EEPROM; U17	256Kbit	Yes	Yes	Storing FRU data	1) System software; Linux/Windows utility thru Ethernet Controller (82599) 2) Any utility capable of accessing EEPROM's I2C bus thru JTAG header (if the header is installed) 3) Any utility capable of accessing EEPROM's I2C bus thru XMC P15 pins F14 (I2C_DATA) and F16 (I2C_CLK).
EEPROM; U14	128Kbit	Yes	Yes	Storing Ethernet Controller configuration parameters	System software; Linux/Windows utility thru Ethernet Controller (82599)

- No classified data is programmed into Non-Volatile storage.
